CALL FOR PAPERS

**THE SECOND AIS SIGSAND
EUROPEAN SYMPOSIUM
ON SYSTEMS ANALYSIS AND DESIGN**

UNIVERSITY OF GDANSK, POLAND

JUNE 5TH 2007

[HTTP://SIGSAND.UNIV.GDA.PL](http://SIGSAND.UNIV.GDA.PL)

Background

Effective systems analysis and design is a key factor in the successful application of computer-based systems. However, research into systems analysis and design seems to have received less attention in recent years than it did in the past. This does not mean that we know everything we need to know about systems analysis and design. On the contrary, new applications of computer-based systems are being developed, which need appropriate methods of analysis and design (e.g. Web-based systems and ubiquitous computing), new systems development methods have emerged, which need empirical study and evaluation (e.g. agile methods), and an opportunity now arises to reflect upon whether the lessons learnt earlier about systems analysis and design have been applied or have been forgotten.

The objective of this symposium is to provide a forum for researchers, educators and practitioners interested in systems analysis and design to meet and exchange ideas and results. It also provides researchers an opportunity to present their research papers and experience reports, and to take part in open discussions.
